EDUCATION

Bachelor of Science in Software Engineering
Islamia University Bahawalpur

10/2021 - 06/2025   *Bahawalpur*

NOTABLE CONTRIBUTIONS

Abilite – Internal Audit Management Platform
Abilite is an internal audit management platform that helps organizations manage compliance, risk, and audit processes more efficiently. While working at Hyphen Consultancy Tech, I handled the complete frontend development of its third version using React.js. The company moved to this version from an older tech stack, replacing the outdated frontend with a faster and more scalable React-based solution. I built responsive UI components, integrated APIs, and focused on making the interface clean, fast, and easy to use.

Go Fatoorah – Invoicing System
Go Fatoorah is a complete invoicing and payment system designed for businesses. I developed the frontend while working at Hyphen Consultancy Tech using HTML, CSS, JavaScript, and Angular. The platform includes key features like user management, invoice generation, detailed reporting, and customizable settings — all built to support efficient, accurate, and user-friendly financial operations.
